Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on March 23, 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Applicant's response filed March 23, 2006 has been thoroughly reviewed and considered by the examiner. Applicant has elected with traverse the Group I invention, readable on claims 1-14 and 21. Upon further consideration of the restriction requirement in light of applicant's arguments, the restriction requirement is hereby withdrawn and all pending claims have been examined.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2, 10, 16 and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims identify or recite "a bias" associated with the cushion filter, the term "bias" seemingly conflicting with the definition given the term in the specification. The term "bias" has been defined in the specification on page 11 to be a difference between the actual sample and the estimate of what the sample would be without any anomalies. The "cushion" is an adjustment to this bias. The above claims, however,

recite that the "bias" comprises a cushion and an increment. These claims are further confusing because the "cushion" is readable as an incremental change or adjustment to the bias.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 10, 16 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The above claims are vague and indefinite because the definition of the term "bias" is unknown and/or contradictory in view of the definition given the term in the specification as discussed in the above paragraph.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 9 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Boger et al (U.S. Patent No. 6,272,401). The patent to Boger et al discloses a valve positioner apparatus comprising a cushion filter compensating a signal offset value (bias), the bias being adjusted by a cushion (C), see col. 9, lines 15-65. A computer

program comprising computer readable program code is integral with the controller, col. 9, lines 31-33.

Allowable Subject Matter

Claims 3-8, 11-14 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
